

Amit Chaudhary

Senior Ruby on Rails Engineer & Architect

chaudharyamitiit2007@gmail.com | +91-8882973475 | India (Remote) | [linkedin.com/in/amit-chaudhary-iitg](https://www.linkedin.com/in/amit-chaudhary-iitg) | github.com/chaudhary

SUMMARY

Senior Ruby on Rails engineer and architect with 14+ years building production B2B and B2C products. Independent contractor for US and UK remote teams, invoicing directly. Specialized in legacy Rails and Ruby upgrades, performance and scaling, codebase rescue, and pragmatic AI-assisted development.

EXPERIENCE

Staff Engineer, OutX

Jan 2026 – Jun 2026

Remote · Contract

Subscription LinkedIn tracking and automation platform where users follow keywords to surface relevant posts and automate their LinkedIn workflows. Built the backend on Supabase and the React + JavaScript Chrome extension that powers the in-LinkedIn experience.

Technical Architect, Qodex.ai

Jul 2025 – Dec 2025

Remote · Contract

API automation-testing platform (Ruby on Rails + PostgreSQL + ReactJS). Owned backend architecture and RESTful APIs, automated deploys on Docker / ECS / GitHub Actions, SEO-indexable public pages via AWS Lambda, S3 and CloudFront, and a system for defining dynamic JavaScript functions from the UI, executed server-side with ExecJS.

Senior Ruby on Rails Engineer, Building Intelligence

Apr 2024 – Jul 2025

Remote · Contract via Toptal

Monolithic US physical-security platform for visitor, vehicle and vendor management (Ruby on Rails + MongoDB/Mongoid backend, AngularJS frontend). Led the Ruby and Rails version upgrade plus Mongoid and OpenSearch modernization, refactored the scheduling and delivery feature, and built a data-import system for drivers, vendors, tenants and other entity types.

Lead Software Engineer, W Energy Software (SevenLakes Technologies)

Oct 2022 – Mar 2024

Remote

Led backend development of a cloud oil-&-gas ERP SaaS in Ruby on Rails with a team of five. Owned core backend functionality and unit testing, and maintained the AWS deployment infrastructure, monitoring service performance day to day.

Senior Backend Engineer, HealthTap India

Nov 2018 – Oct 2022

Gurgaon

Backend for a nationwide US virtual primary-care practice. Built automated GitHub branch backmerge via Actions + REST API, a generic email open/click tracking system, customised delayed_job for multi-threaded jobs, an affiliate model with event tracking, and pipelines for importing complex enterprise data files.

Senior Product Engineer, AlmaConnect Solutions

Dec 2012 – Oct 2018

Gurgaon

Built AlmaConnect (alumni networking) and Tradilio (stock-trading social app) on Ruby on Rails, MongoDB, Elasticsearch, AngularJS and React Native. Published the open-source AcDenormalize gem for denormalizing association fields, integrated RazorPay/ATOM payments, did AWS Lambda image processing, and designed real-time chat with Pusher.

Software Engineer, Navyug Infosolutions

Oct 2011 – Dec 2012

Noida

Built Ruby on Rails + SproutCore web applications and implemented business schemes using a Drools rule engine.

TECHNICAL SKILLS

Core	Ruby, Rails, Hotwire / Turbo, ReactJS, React Native, AngularJS, JavaScript, jQuery, HTML5, CSS3
Data	PostgreSQL, MongoDB, MySQL, Supabase, Elasticsearch, OpenSearch, Redis
Infra	AWS (Lambda, S3, ECS, CloudFront), Docker, GitHub Actions, CircleCI, Git
AI	LLM agents, RAG, evaluations, coding-agent workflows

EDUCATION

B.Tech, Engineering Physics · Indian Institute of Technology, Guwahati

2011 · 7.35 CGPA
